CHECKLIST WEB DESIGN BOOTCAMP

Module 1

- I have selected a .com website domain in my own name (first name + last name)
- I have selected a .com website with the name of my signature system, program or product
- If I was unable to secure a .com website in my own name, I chose the most logical alternate name or extension
- Even if I am not planning to run a website right now in my own name, I am ready to register the .com domain for my first and last name anyway, if available
- When creating a website name, I am focusing on:
 - What search terms my ideal visitors are likely to search with
 - What is most memorable
- I am thinking of my future online plans, when choosing my domain name
- I understand that Aztec Design Studio will pay for the registration of the primary website which will be designed by Aztec Design Studio and that the initial payment and subsequent yearly renewals will be included in the contract price for services for the duration of the contract.
- I understand that any additional domains I choose to register (such as a domain name using my personal name) will be billed separately to me at the prevailing cost, without markup, unless Aztec Design Studio creates a website for me using that domain name under a separate contract. Aztec Design Studio utilizes the services of [ionos.com](https://www.ionos.com) for all domain registrations.
- I understand that my site will be hosted by Aztec Design Studio on their dedicated servers.
- If I have already registered my domain:
 - I am ready to point my Name Servers to the Aztec Design Studio server, if different from the registrar
- I have chosen a unique Admin name that is not “Admin” or my own name
- I am ready for Module 2!
